MegaOne – One Page + Multipage Parallax HTML5 is the biggest template of 2023. This trendy and super responsive template is suitable for any kind of business startups. It is built using Bootstrap4 framework. 155+ truly unique demo websites (not only templates) including their respective blog and blog detail pages are also included in this template with lots of CSS and JQuery animations. A perfect template for business startups, web studio, digital agencies, consulting firms, food restaurants, medical doctors, model agencies, yoga and fitness professionals, personal business and photographers.

The standard information sections will help anyone to customize according to their branding info. This template is very well commented and also have proper help documentation too.

Elite Author

Velzon is a fully responsive and premium **Bootstrap 5** Admin & Dashboard Template built in **HTML, React js, Angular 15, Vue 3, Laravel 10, ASP.Net Core 7, Django, Svelte, CodeIgniter, Symfony, PHP, Ajax, Flask, AIOHTTP, Bottle, Node Js (EJS) & Cake PHP**. Whether you're creating a **web app, dashboards, admin panels, eCommerce app, Project management, Crypto admin, CRM, or SASS-based** interface then you are at the right place to buy this admin dashboard template. We have used gulp-based build tools and SCSS variables-based modes along with RTL supported except (Ajax, PHP, Symfony & Nodejs). You can quickly change the layout or mode by changing data attributes only instead of changing huge lines of code. We have written complete minimal code for the beautiful UI. Velzon has **8 demos 5 types** of different **layouts (Vertical, Horizontal, Detached, Two Columns & Hovered)** with multiple options like **Fixed & Scrollable**. Also support **Dark, Light, and RTL** modes and many other options which help you in creating a new project.

Velzon has 6 dashboards, 12+ apps, and Landing Pages that can be used in Analytics, CRM, Ecommerce, Crypto, Project management, support, NFT marketplace, or any other custom projects.

Velzon has 165+ pages, 40+ components, 30+ charts, 30+ widgets with fully responsive design in Desktops, Tablets and Mobile devices.

Ready to use apps:

We have not provided fully working apps with a database. All the apps are working with JavaScript which helps the developer to move faster in building real web application.
